Asbestos Register

WESTERN CAPE COLLEGE - JUNIOR CAMPUS - WEIPA

Current as at: 24/05/2017 10:50:07 AM

Quality Control:

Document Identification Number

Nominated Officer Name

DHPW Version 6.0 October 2014

**ASBESTOS REGISTER FOR WESTERN CAPE COLLEGE - JUNIOR CAMPUS - WEIPA
(21407000)**

Owner: Department of Education and Training

Improvements:

AA - Other (refer to description):	1
BU - Building:	31
CW - Covered Way:	15
GG - General Grounds:	3
MD - Modular/Demountable:	4
SH - Shed:	4
SS - Sun Shade/Shelters:	9

Date Printed:

24/05/2017 10:50:08 AM

Warning Notice:	Do not rely solely on the completeness of this Asbestos Register as all asbestos containing material may not be identified and listed, particularly in inaccessible locations and other areas not readily accessed e.g. wall cavities and ceiling spaces. If there is any doubt, presume the material contains asbestos and take appropriate precautions prior to undertaking work. Please read the information contained in the Legends at the end of the Asbestos Register.

BEMIR Score	Physical state
1 - 25: Can be managed in-situ. Negligible hazard potential. Safe work procedures required if disturbed.	5: intact and stable, good condition
26 - 50: Can be managed in-situ. Low hazard potential. Seek advice from competent person if disturbed.	4: intact and stable, only minor wear
51 - 75: May need attention. Moderate hazard potential. Seek advice from competent person if disturbed.	3: intact and stable, slight damage
76 - 100: Needs attention. Hazardous. Special precautions are required if disturbed.	2: reduced stability, degrading
	1: unstable, severely deteriorated or major damage

Form	Type*	Test Results
AA – Whole Building (asbestos free)		NAD – no asbestos detected
AD – Adhesive	Bonded	CHR – chrysotile
CB – Cement Based	Bonded	AMO – amosite
FF – Fibrous Felt	Friable	CHR AMO – chrysotile amosite
IB – Insulation Board	Friable	CHR CRO – chrysotile crocidolite
LA – Lagging	Friable	AMO CRO – amosite crocidolite
LD – Low Density Board	Friable	CHR AMO CRO – chrysotile amosite crocidolite
LF – Loose Fill	Friable	Mixed – Contains more than one asbestos type**
MF – Mastic/Filler	Bonded	To Be Determined – no sampling and analysis carried out;
MI – Millboard	Friable	sampling and analysis required to determine ACM presence
PB – Polymer Bound	Bonded	Not Determined – no sampling and analysis carried out prior to removal
SC – Sprayed Coating	Friable	Not required – Material confirmed non ACM; sampling and analysis not required
VS – Vinyl Sheeting (backing)	Friable	
VT – Vinyl Tiles	Bonded	
WT – Woven Textile	Friable	
*Bonded forms of ACM in a deteriorated condition may become friable		** Test required to identify specific asbestos types

Agency Name:	Department of Education and Training	Facility :	WESTERN CAPE COLLEGE - JUNIOR CAMPUS - WEIPA
Region :	Far North Queensland	Site :	WESTERN CAPE COLLEGE - JUNIOR CAMPUS - WEIPA
District :	FNQ Western Cape	Improvement :	All
		Improvement Group :	All

Warning Notice:

Do not rely solely on the completeness of this Asbestos Register as all asbestos containing material may not be identified and listed, particularly in inaccessible locations and other areas not readily accessed e.g. wall cavities and ceiling spaces. If there is any doubt, presume the material contains asbestos and take appropriate precautions prior to undertaking work. Please read the information contained in the Legends at the end of the Asbestos Register.

LEGENDS

BEMIR Score	Physical state
1 - 25: Can be managed in-situ. Negligible hazard potential. Safe work procedures required if disturbed.	5: intact and stable, good condition
26 - 50: Can be managed in-situ. Low hazard potential. Seek advice from competent person if disturbed.	4: intact and stable, only minor wear
51 - 75: May need attention. Moderate hazard potential. Seek advice from competent person if disturbed.	3: intact and stable, slight damage
	2: reduced stability, degrading
76 - 100: Needs attention. Hazardous. Special precautions are required if disturbed.	1: unstable, severely deteriorated or major damage

The BEMIR score provides a guide to the safe management of the ACM. It is an assessment of risk that takes into consideration the form of the ACM, the condition of the ACM, and the likelihood of disturbance of the ACM. The risk assessment is conducted on the date of the asbestos survey/inspection noted in the Asbestos Register		
Form	Type*	Test Results
AA – Whole Building (asbestos free)		NAD – no asbestos detected
AD – Adhesive	Bonded	CHR – chrysotile
CB – Cement Based	Bonded	AMO – amosite
FF – Fibrous Felt	Friable	CHR AMO – chrysotile amosite
IB – Insulation Board	Friable	CHR CRO – chrysotile crocidolite
LA – Lagging	Friable	AMO CRO – amosite crocidolite
LD – Low Density Board	Friable	CHR AMO CRO – chrysotile amosite crocidolite
LF – Loose Fill	Friable	Mixed – Contains more than one asbestos type**
MF – Mastic/Filler	Bonded	To Be Determined – no sampling and analysis carried out;
MI – Millboard	Friable	sampling and analysis required to determine ACM presence
PB – Polymer Bound	Bonded	Not Determined – no sampling and analysis carried out prior to removal
SC – Sprayed Coating	Friable	Not required – Material confirmed non ACM; sampling and analysis not required
VS – Vinyl Sheeting (backing)	Friable	
VT – Vinyl Tiles	Bonded	
WT – Woven Textile	Friable	
*Bonded forms of ACM in a deteriorated condition may become friable		** Test required to identify specific asbestos types

Owner: Department of Education Training and the Arts
(Education)

Improvements: BU - Building: 1
GG - General Grounds: 1

Date Printed: 24/04/2013 4:07:13 PM

Warning Notice: Do not rely solely on the completeness of this Asbestos Register as all asbestos containing material may not be identified and listed, particularly in inaccessible locations and other areas not readily accessed e.g. wall cavities and ceiling spaces. If there is any doubt, presume the material contains asbestos and take appropriate precautions prior to undertaking work. Please read the information contained in the Legends at the end of the Asbestos Register.

Record of Asbestos Containing Material printed on 24/04/2013

LEGENDS

BEMIR Score

1 - 25: Can be managed in-situ. Negligible hazard potential. Safe work procedures required if disturbed.

26 - 50: Can be managed in-situ. Low hazard potential. Seek advice from competent person if disturbed.

51 - 75: May need attention. Moderate hazard potential. Seek advice from competent person if disturbed.

76 - 100: Needs attention. Hazardous. Special precautions are required if disturbed.

Physical state

5: intact and stable, good condition

4: intact and stable, only minor wear

3: intact and stable, slight damage

2: reduced stability, degrading

1: unstable, severely deteriorated or major damage

The BEMIR score provides a guide to the safe management of the ACM. It is an assessment of risk that takes into consideration the form of the ACM, the condition of the ACM, and the likelihood of disturbance of the ACM. The risk assessment is conducted on the date of the asbestos survey/inspection noted in the Asbestos Register

Form

Type*

AA – Whole Building (asbestos free)

AD – Adhesive

CB – Cement Based

FF – Fibrous Felt

IB – Insulation Board

LA – Lagging

LD – Low Density Board

LF – Loose Fill

MF – Mastic/Filler

MI – Millboard

PB – Polymer Bound

SC – Sprayed Coating

VS – Vinyl Sheeting (backing)

VT – Vinyl Tiles

WT – Woven Textile

*Bonded forms of ACM in a deteriorated condition may become friable

Test Results

NAD – no asbestos detected

CHR – chrysotile

AMO – amosite

CHR AMO – chrysotile amosite

CHR CRO – chrysotile crocidolite

AMO CRO – amosite crocidolite

CHR AMO CRO – chrysotile amosite crocidolite

Mixed – Contains more than one asbestos type**

To Be Determined – no sampling and analysis carried out;

sampling and analysis required to determine ACM presence

Not Determined – no sampling and analysis carried out prior to removal

Not required – Material confirmed non ACM; sampling and analysis not required

** Test required to identify specific asbestos types

Warning Notice:	Do not rely solely on the completeness of this Asbestos Register as all asbestos containing material may not be identified and listed, particularly in inaccessible locations and other areas not readily accessed e.g. wall cavities and ceiling spaces. If there is any doubt, presume the material contains asbestos and take appropriate precautions prior to undertaking work. Please read the information contained in the Legends at the end of the Asbestos Register.

LEGENDS

BEMIR Score

1 - 25: Can be managed in-situ. Negligible hazard potential. Safe work procedures required if disturbed.
26 - 50: Can be managed in-situ. Low hazard potential. Seek advice from competent person if disturbed.
51 - 75: May need attention. Moderate hazard potential. Seek advice from competent person if disturbed.
76 - 100: Needs attention. Hazardous. Special precautions are required if disturbed.

Physical state

- 5: intact and stable, good condition
- 4: intact and stable, only minor wear
- 3: intact and stable, slight damage
- 2: reduced stability, degrading
- 1: unstable, severely deteriorated or major damage

The BEMIR score provides a guide to the safe management of the ACM. It is an assessment of risk that takes into consideration the form of the ACM, the condition of the ACM, and the likelihood of disturbance of the ACM. The risk assessment is conducted on the date of the asbestos survey/inspection noted in the Asbestos Register

Form	Type*	Test Results
AA – Whole Building (asbestos free)		NAD – no asbestos detected
AD – Adhesive	Bonded	CHR – chrysotile
CB – Cement Based	Bonded	AMO – amosite
FF – Fibrous Felt	Friable	CHR AMO – chrysotile amosite
IB – Insulation Board	Friable	CHR CRO – chrysotile crocidolite
LA – Lagging	Friable	AMO CRO – amosite crocidolite
LD – Low Density Board	Friable	CHR AMO CRO – chrysotile amosite crocidolite
LF – Loose Fill	Friable	Mixed – Contains more than one asbestos type**
MF – Mastic/Filler	Bonded	To Be Determined – no sampling and analysis carried out;
MI – Millboard	Friable	sampling and analysis required to determine ACM presence
PB – Polymer Bound	Bonded	Not Determined – no sampling and analysis carried out prior to removal
SC – Sprayed Coating	Friable	Not required – Material confirmed non ACM; sampling and analysis not required
VS – Vinyl Sheeting (backing)	Friable	
VT – Vinyl Tiles	Bonded	
WT – Woven Textile	Friable	

*Bonded forms of ACM in a deteriorated condition may become friable

** Test required to identify specific asbestos types

Nominated Officer Name

Agency Name:	Department of Education and Training	Facility :	WESTERN CAPE COLLEGE - JUNIOR CAMPUS - WEIPA
Region :	Far North Queensland	Site :	All
District :	FNQ Western Cape	Improvement :	All
		Improvement Group :	All

Warning Notice:	Do not rely solely on the completeness of this Asbestos Register as all asbestos containing material may not be identified and listed, particularly in inaccessible locations and other areas not readily accessed e.g. wall cavities and ceiling spaces. If there is any doubt, presume the material contains asbestos and take appropriate precautions prior to undertaking work. Please read the information contained in the Legends at the end of the Asbestos Register.

LEGENDS

BEMIR Score	Physical state
1 - 25: Can be managed in-situ. Negligible hazard potential. Safe work procedures required if disturbed.	5: intact and stable, good condition
26 - 50: Can be managed in-situ. Low hazard potential. Seek advice from competent person if disturbed.	4: intact and stable, only minor wear
51 - 75: May need attention. Moderate hazard potential. Seek advice from competent person if disturbed.	3: intact and stable, slight damage
	2: reduced stability, degrading
76 - 100: Needs attention. Hazardous. Special precautions are required if disturbed.	1: unstable, severely deteriorated or major damage

The BEMIR score provides a guide to the safe management of the ACM. It is an assessment of risk that takes into consideration the form of the ACM, the condition of the ACM, and the likelihood of disturbance of the ACM. The risk assessment is conducted on the date of the asbestos survey/inspection noted in the Asbestos Register		
Form	Type*	Test Results
AA – Whole Building (asbestos free)		NAD – no asbestos detected
AD – Adhesive	Bonded	CHR – chrysotile
CB – Cement Based	Bonded	AMO – amosite
FF – Fibrous Felt	Friable	CHR AMO – chrysotile amosite
IB – Insulation Board	Friable	CHR CRO – chrysotile crocidolite
LA – Lagging	Friable	AMO CRO – amosite crocidolite
LD – Low Density Board	Friable	CHR AMO CRO – chrysotile amosite crocidolite
LF – Loose Fill	Friable	Mixed – Contains more than one asbestos type**
MF – Mastic/Filler	Bonded	To Be Determined – no sampling and analysis carried out;
MI – Millboard	Friable	sampling and analysis required to determine ACM presence
PB – Polymer Bound	Bonded	Not Determined – no sampling and analysis carried out prior to removal
SC – Sprayed Coating	Friable	Not required – Material confirmed non ACM; sampling and analysis not required
VS – Vinyl Sheeting (backing)	Friable	
VT – Vinyl Tiles	Bonded	
WT – Woven Textile	Friable	
*Bonded forms of ACM in a deteriorated condition may become friable		** Test required to identify specific asbestos types
