

## 2024 Next Step Year 12 Completers

## Destinations of Year 12 completers from 2023 in Queensland

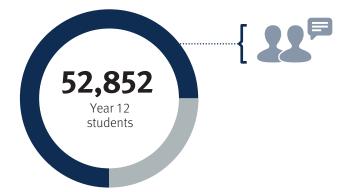

Since 2005, the Department of Education's **Next Step** survey has captured information about the journey from school to further study and employment for Year 12 completers.

Insights gained from **Next Step** assist schools to review and plan their services for students, and school system personnel to evaluate education policies as they affect the transition from school to further study and employment.

The survey is conducted between March and June, approximately six months after the end of the school year, timed to occur after tertiary education places for the year have been accepted. All students who attend state, Catholic and independent schools in Queensland are included.

## 2024 Next Step survey

Year 12 students from 2023 were included in the 2024 survey from Queensland schools

39,587 respondents

**74.9**% response rate

23,033 State schools

7,997 Catholic schools

8,557 Independent schools

## Post-school engagement

## Engagement in education, employment or training

All Year 12 completers were assigned to a **main destination**. This categorisation system prioritises education related destinations over other destinations. Those who were both studying and working are reported as studying for their main destination.

In 2024, overall engagement decreased to 89.9%, but remains higher than the pre-COVID (2019) level. Post-school destinations are strongly linked to the health of the broader economy. Since peaking in 2021 during early COVID engagement in study has trended downwards to reach pre-COVID levels whereas engagement in employment remains high in the context of historically low unemployment.

## **Engagement by subgroups**

in education or training

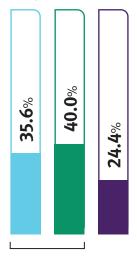

in employment only

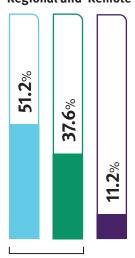

not in education, employment or training

## **Indigenous**

**75.6**% of 1,986 **Indigenous** respondents<sup>2</sup> were engaged

## Regional and Remote

88.8% of 12,857 regional and remote respondents³ were engaged

## Disadvantaged

81.6% of 5,871 respondents from disadvantaged areas<sup>4</sup> were engaged

<sup>&</sup>lt;sup>1</sup> Percentages in this report have been rounded to one decimal point.

<sup>&</sup>lt;sup>2</sup> The word Indigenous in this document refers to Aboriginal peoples and Torres Strait Islander peoples. Comparisons with other groups should be interpreted with caution due to the lower survey response rate for Indigenous persons (63.6%).

<sup>3</sup> Students who were not living in a 'Major Cities' category area of the Australian Bureau of Statistics' Remoteness Structure (2021).

<sup>&</sup>lt;sup>4</sup> Australian Bureau of Statistics' Index of Relative Socio-Économic Disadvantage (Queensland, Quintile 1, area based).
