New school recommendations reflect the potential need of new state and non-state primary and secondary schools based on an assessment of the 2023 edition Queensland Government population projections, local advice on population growth and available capacity within the existing school network. The growth SA2s, shown above, were selected for detailed assessment during the Demand Mapping Meeting. Areas for assessment are comprised of one or more Statistical Areas Level 2 (SA2s) which are established by the Australian Bureau of Statistics and are the smallest statistical area commonly used for a range of statistical information including population projections. Population projections used to inform this assessment are prepared by the Queensland Government Statistician’s Office and can be accessed [here](#).
