# Facilities upgrades at Springfield Central State High School

## Investing in new facilities to support teaching and learning

The Department of Education is delivering a range of upgrades to facilities at Springfield Central State High School. The development will provide the school with new and upgraded facilities to meet curriculum needs and, to provide a safe and comfortable environment, work will be delivered in stages to minimise disruption.

### Current project scope (funded)

#### Stage 1

The works will begin in late September 2025 and will include:

- upgrading the canteen and servery areas to streamline food purchases (Block D)
- a dedicated collection area for pre-ordered food (Block D)
- an upgraded home economics kitchen and a new composite junior/senior kitchen and cafe (Block D)
- sound proofing undercover eating areas (Block I).

Temporary facilities will be provided while the works are underway. Two existing home economics kitchens will remain operational.

Stage 1 works are scheduled for completion for the start of the 2026 school year (weather and conditions dependent).

### Future stages (funded)

The planned works include:

- reconfiguring the library and adjacent classrooms to create a new library service desk, upgraded IT support area and learning spaces
- new basketball courts enhancing the current outdoor recreation areas
- extending existing Industrial Technology and Design (ITD) workshops and the provision of a new materials preparation area (Blocks C and H).

The department has not yet scheduled the start of these works and will share information with the community once it is available.
