

Renewing Our Schools: Upgrading school infrastructure

Program overview

The Queensland Government is investing **\$235 million** in the Renewing Our Schools program to upgrade school infrastructure across the state. The program will **upgrade 17 schools**, all more than 30 years old.

For many of the schools, this will be the most significant infrastructure investment in decades. The program will deliver both new and refurbished modern learning facilities for all schools **by late 2020**.

Investing **\$235m** to upgrade school infrastructure

Upgrade of **17 schools**

Delivered in **2020**

Program timeline

Progress update

Up until this point the project has been in the planning phase and this year, will begin moving into the delivery phase.

The Department of Education has partnered with the Department of Housing and Public Works Building and Asset Services (BAS) team to deliver the program.

The Department has completed site visits to consult with each school and scope infrastructure renewal requirements. This signature program is delivering a broad range of exciting projects to meet school needs including multipurpose sports centres, resource centres, general learning areas, science laboratories, performing arts centres, the refurbishment of existing facilities, IT hubs and communication upgrades – all informed by local school priorities.

All projects within the program are on track to have construction contracts awarded in 2019.

The Queensland Government is proud to be investing in enhanced facilities for local students.
